

**Sculpting Class Semester 1, Year 2 Selia Karsten**

This semester I have accomplished the following:

**Lips, nose and skull studies** in clay: (example)

I built a clay model of a classmate's head.

I researched and created a **maquette** for a fusion head based on a head by sculptor Elizabeth Frink and the head of Egyptian Pharaoh Amenhotep III.

- I built the **fusion head** from clay and styrofoam.
- I created a **display board** to illustrate the synthesis of the fusion head project.
- Except for two classes missed for medical reasons and one for illness, I was on time and worked steadily throughout classes on these projects. I attended demonstrations, took notes and pictures and obtained other photos from classmates. All notes and images for all stages of the waste mold process are published in my art school blog.
